

KNIFE GATE VALVE

Product Overview

The Knife Gate Valve is designed for reliable shut-off and isolation in abrasive slurry and ore applications. Built for long service life and dependable performance in demanding mining environments.

Key Features

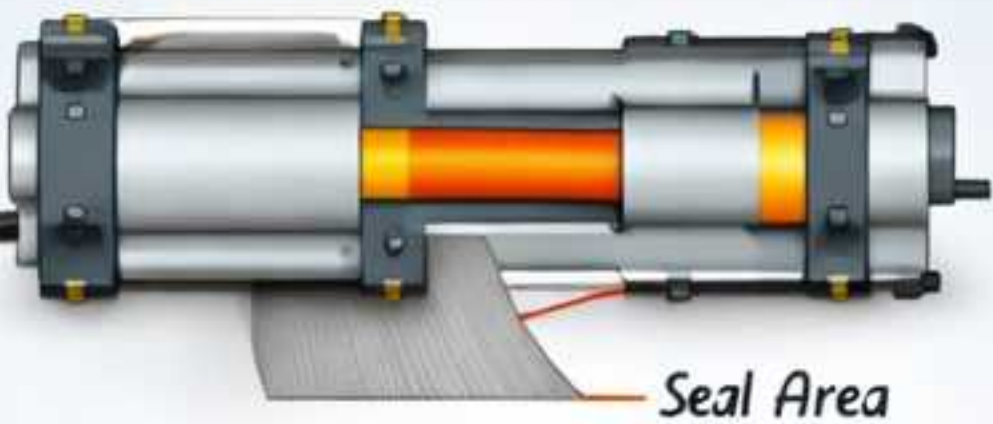

- **Compact design** for slurry and mineral processing
- **Full bore flow** – Minimal pressure drop
- **Positive shut-off** – Leak-tight performance
- **Wafer, Lug & Flanged** options - in flanged options.

Available Sizes	
Nominal Diameter (N)	Pressure Rating (PN)
DN25	PN16
DN40	PN16
DN40	PN16
DN55	PN16
DN60	PN16
DN105	PN16
DN105	PN10
DN125	PN10
DN160	PN20
DN250	PN10
DN300	PN6

Actuator Schematic

Typical Mining Applications

- Thickener Underflow
- Mill Discharge Points
- Tailings & Slurry Lines
- Slurry Pump Isolation
